U.S. FOREIGN TRADE EXPORT AND IMPORT MERCHANDISE SEPTEMBER 1971

FT 900-71-9
October 28, 1971

U.S. DEPARTMENT OF COMMERCE Bureau of the Census

Seasonally Adjusted and Unadjusted Data

The Bureau of the Census, Department of Commerce, announced today that during September 1971, seasonally adjusted exports, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, amounted to $4,510.6 million and that seasonally adjusted general imports for September amounted to $4,245.2 million.[1] [2] Comparable seasonally adjusted totals for August were $3,677.7 million for exports and $3,937.4 million for imports.

Based on seasonally adjusted figures, the September trade surplus (exports excluding Department of Defense Grant-Aid shipments minus general imports) was $265.4 million. The 9-month period January to September 1971, however, recorded a deficit as imports exceeded exports by $670.7 million.

In September, seasonally adjusted exports reached $4.5 billion for the first time in history while imports reached $4.0 billion for the second time this year. The Bureau pointed out that both figures are affected by the influence of accelerated export and import activity in anticipation of a dock strike at U.S. east and gulf coast ports which actually began on October 1, as well as the reduction in vessel activity at U.S. west coast ports resulting from the continuation of a dock strike which began on July 1 and continued throughout the months of July, August, and September. The Bureau, however, does not have adequate information to enable it to specifically measure the influence of actual or pending strikes on the statistics.

During the first 9 months of 1971, exports on a seasonally adjusted basis were at an annual rate of $45,184 million, about 6 percent above the calendar year 1970 total of $42,659 million. Imports were at an annual rate of $46,078 million, about 15 percent above the calendar year 1970 total of $39,952 million. For the 4-month period June-September 1971, seasonally adjusted exports averaged $3,835.9 million per month, a level about 4 percent above the $3,702.3 million average reported for the preceding 4-month period, February-May 1971. Imports averaged $4,001.1 million per month for the current 4-month period, about 8 percent higher than the $3,717.0 million average reported for the preceding 4-month period.

Seasonally adjusted export and import totals for selected Schedule A and B commodity sections and divisions are shown in tables 4 and 5. (Unlike the overall total, the commodity components for exports exclude foreign merchandise and include DOD Military Assistance Program Grant-Aid shipments.)

Exports, unadjusted for seasonal change and excluding Military Assistance Program Grant-Aid shipments, increased from $3,366.2 million in August to $4,225.1 million in September. With Military Assistance Program Grant-Aid shipments included, September exports were valued at $4,264.9 million as compared to $3,423.8 million in August. Unadjusted general imports were valued at $4,253.7 million in September and $3,847.2 million in August.

---

[1] *Adjusted for seasonal and working-day variation, but not for price level.*

[2] *Cumulations of data over at least 3- or 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following table with average percent month-to-month rise and decline over longer periods shown for comparison. The average rise and decline figures exclude percentage changes for (1) the periods January-May 1965 and December 1968-March 1969 because of abnormalities in the data due to effects of strikes and (2) periods when negligible changes (zero percent) in the level of exports/imports occurred:*

Series	Month-to-month				Average monthly rates of change			
	Aug.-Sept. 1971	July-Aug. 1971	June-July 1971	May-June 1971	Average rise 1965-1970	Average decline 1965-1970	4 months May-Sept. 1971	12 months Sept. 1970-Sept. 1971
Exports....	+22.6%	+5.2%	-4.5%	-3.2%	+4.2%	-3.5%	+5.0%	+2.3%
Imports....	+7.8%	+3.7%	-5.6%	+0.9%	+3.3%	-2.8%	+1.7%	+1.9%

Inquiries concerning these figures should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 440-1431.

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10 cents per copy. Annual subscription (FT 900, 975, 985, and 986 combined) $3.00.

EXPLANATION OF STATISTICS

Import Statistics

General imports are a combination of entries for immediate consumption and entries into bonded warehouses. Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption.

The dollar value shown in the import statistics is defined generally as the market value in the foreign country and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended. None of the values have been adjusted for changes in price level.

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the month of import, which is based on the filing date of the import entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carryover of a small percentage of items from the actual month of importation to a subsequent month, usually the succeeding month. The carryover should have little effect on month-to-month comparisons of overall totals, since the carryover of the previous month should compensate roughly for that of the following month.

Export Statistics

Exports of domestic merchandise include commodities which are grown, produced, or manufactured in the United States, and commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Exports of foreign merchandise include commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in substantially the same condition as when imported.

The dollar value shown in the export statistics is defined generally as the f.a.s. value at the U.S. port of exportation. These values have not been adjusted for changes in price level.

In general, compiling procedures provide for the inclusion of shipments in the statistics for the month of export.[2] However, as indicated above for imports, because of processing problems there has always been a carryover of a small percentage of shipments from their actual month of shipment to a subsequent month, usually the following month. The statement above regarding the effect of the import carryover generally applies to exports also.

Revisions to the Statistics

Revisions are carried into the statistics on a periodic basis. Data for 1970 and 1971 appearing in the 1971 monthly issues of this report are presented as follows:

1971 Statistics

a. January through November 1971 issues: figures are as originally issued, except as noted below.

b. December 1971 issue: figures reflect revisions for prior months of the year issued with December 1971 statistics.

1970 Statistics

a. January through May 1971 issues: figures reflect revisions issued with December 1970 statistics or earlier.

b. June through December 1971 issues: figures reflect revisions to 1970 data issued with June 1971 statistics.

In addition to the revisions which are made on a periodic basis, instances may occur where a significant error in the statistics for a month of the current year is discovered after the statistics for that month are compiled. If the error is of sufficient importance to require correction prior to the time that the regular revisions are carried, the correction is made and so noted in this report.

Sources of Further Information

Additional information regarding foreign trade statistics coverage, valuation, etc., is contained in the following publications: Report FT 990, Highlights of U.S. Export and Import Trade; FT 135, U.S. Imports, General and Consumption, Schedule A Commodity and Country; FT 410, U.S. Exports, Schedule B Commodity and Country; and the Guide to Foreign Trade Statistics. Information regarding additional sources of statistics, the methodology used in seasonally adjusting the data, and other matters relating to foreign trade statistics may be obtained from the Bureau of the Census, Washington, D.C. 20233.

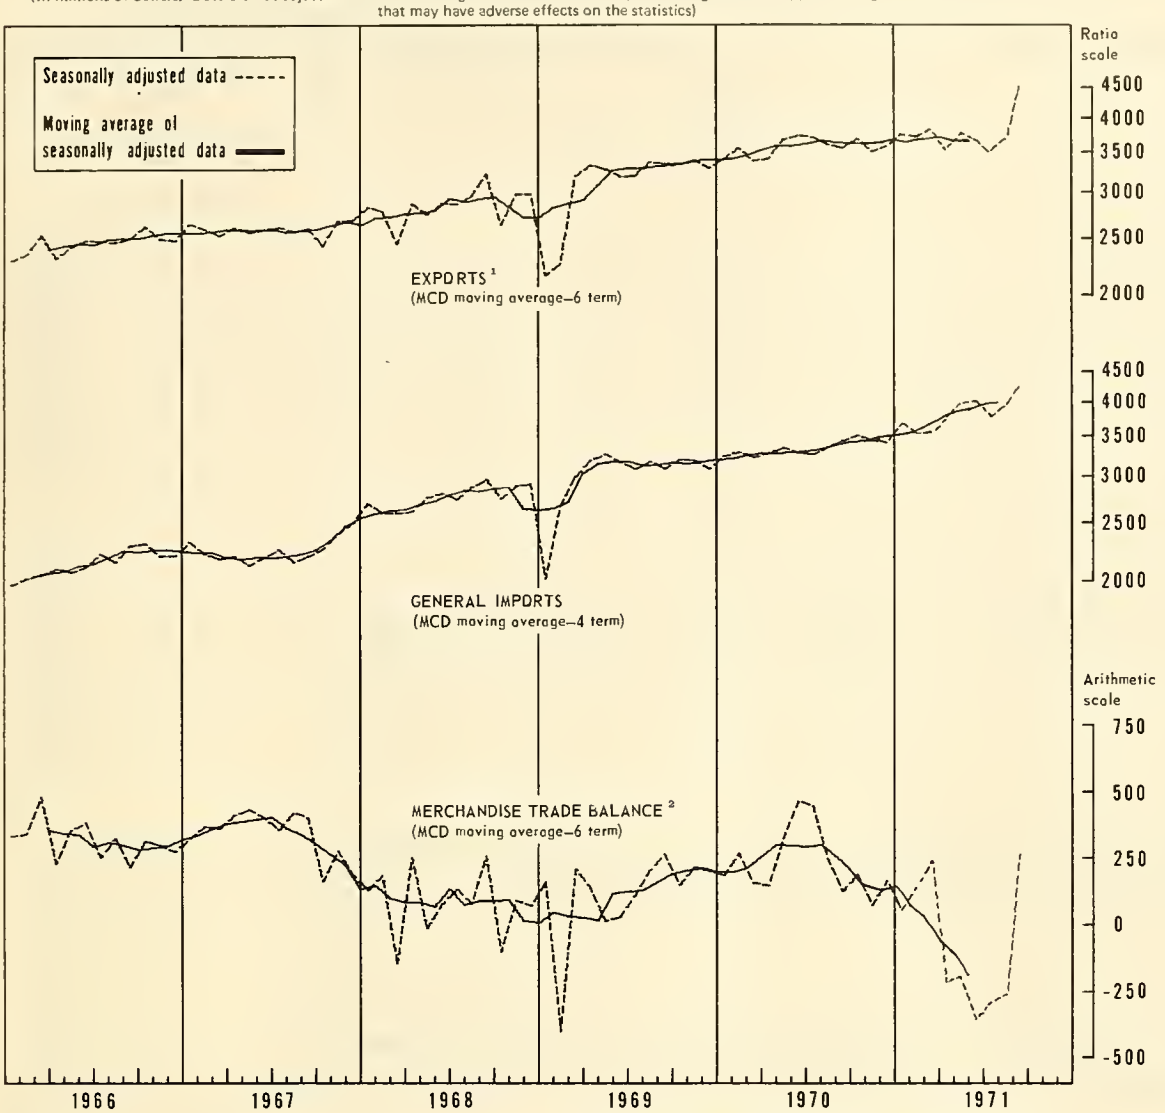
---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

[2] With minor exceptions, the date of export for shipments other than by mail is the date when the shipment leaves the United States, or, in the case of vessel or air shipments, the date when the carrier departs (or is cleared) from the port of export. For mail shipments, the date of export is considered to be the date of mailing.

U.S. Exports, General Imports, and Merchandise Trade Balance, Adjusted for Seasonal and Working-Day Variation: January 1966 to September 1971

(In millions of dollars. Data are not adjusted for unusual changes in the level of activity or coverage such as happens during strikes and other events that may have adverse effects on the statistics)



[1] Represents exports of domestic and foreign merchandise excluding Department of Defense Military Assistance Program Grant-Aid shipments.
[2] Defined as exports (see footnote 1, above) minus general imports.

Table 1. U.S. Exports, General Imports, and Merchandise Trade Balance, Adjusted for Seasonal and Working-Day Variation, by Month: January 1970 to September 1971

(In millions of dollars)

Period and series	January-September	January	February	March	April	May	June	July	August	September	October	November	December

[1]Schedule 8 section and selected division descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related materials
4. Animal and vegetable oils and fats
5. Chemicals
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
   - 71. Machinery, other than electric
   - 72. Electrical machinery, apparatus, and appliances
   - 73. Transport equipment
8. Miscellaneous manufactured articles, n.e.c.
9. Commodities and transactions not classified according to kind

[2]Seasonally adjusted figures for section 7 may differ slightly from the sum of divisions 71,72, and 73 since each is independently adjusted.

[3]Adjusted for seasonal and working-day variation using seasonal adjustment factors introduced in January 1971. Annual totals are not shown for seasonally adjusted data as such totals are not meaningful. Unadjusted data should be used for annual totals. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 2 were adjusted independently.

[4]In the absence of demonstrable seasonal patterns for this section, no seasonal adjustment factors have been applied to date.

[5]Revised.

Table 5. U.S. General Imports-Schedule A Sections, Seasonally Adjusted and Unadjusted by Month: January 1970 to September 1971

(In millions of dollars. Unadjusted totals represent sum of unrounded figures and hence may vary slightly from sum of rounded amounts)
